Warning

Prior to installation, read these installation and operating instructions. Installation and operation must comply with local regulations and accepted codes of good practice.

Read the installation and operating instructions for the relevant CIM module.

1. Symbols used in this document

Warning

If these safety instructions are not observed, it may result in personal injury!

Caution If these safety instructions are not observed, it may result in malfunction or damage to the equipment!

Note Notes or instructions that make the job easier and ensure safe operation.

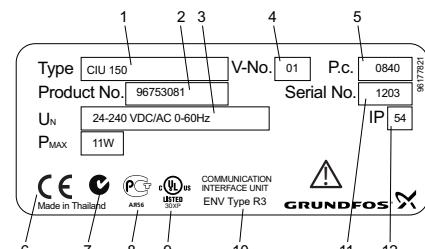

2. Applications

The Grundfos CIU unit (CIU = Communication Interface Unit) is used as a communication interface between a Grundfos product and a main network.

The CIU unit is used together with a CIM module (CIM = Communication Interface Module) fitted in the CIU unit.

GENibus is used for internal communication between the CIU unit and a Grundfos product.

3. Installation kit

The CIU package contains these parts:

- CIU unit with CIM module
- DIN rail clip with screws
- installation and operating instructions for the CIU unit
- installation and operating instructions for the CIM module
- Quick Guide
- CD-ROM (software, functional profiles, installation and operating instructions).

Keep the CD-ROM and the installation and operating instructions so that they are easy to find when the CIU unit/CIM module is to be integrated into the main communications network.

Note

4. Installation

The CIU unit can be mounted on a wall or on a DIN rail in a control cabinet.

4.1 Wall mounting

Mount the CIU unit on the wall. See fig. 2 and the drilling template in the Quick Guide to the CIU unit.

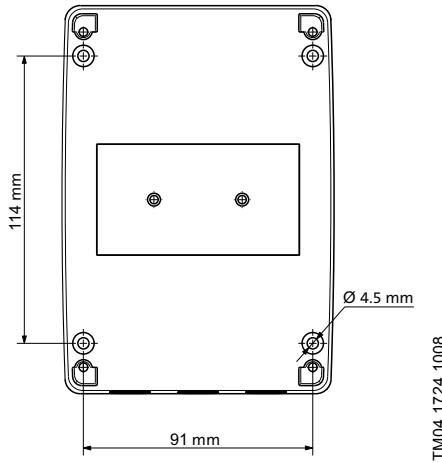

Fig. 2 Wall mounting of the CIU unit

4.2 Mounting in control cabinet

When the CIU unit is mounted in a control cabinet containing a frequency converter, it is especially important to ensure an EMC-correct installation of both the CIU unit, CIM module and frequency converter.

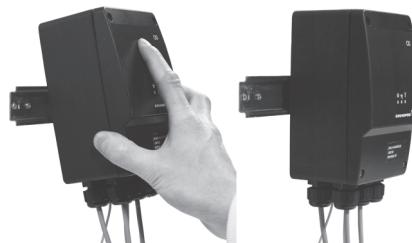

The following rules must therefore be observed:

- All cable screens must be connected to earth. If it is not possible to use cable clamps, the stripped part of the cable screen must be as short as possible to reduce the impedance at high frequencies.
- All units in the control cabinet must be connected to earth.

Mounting on DIN rail

The CIU unit is prepared for mounting on a 35 mm DIN rail (EN 50022).

1. Fix the DIN rail clip supplied on the CIU unit. See the instructions on the CIU unit.
2. Fit the CIU unit by hooking the top on the DIN rail and clicking the bottom onto the rail. See fig. 3.

TM04 1727 0309

Fig. 3 CIU unit on DIN rail

Dismounting from DIN rail

Remove the CIU unit by pulling it downwards and free of the DIN rail.

4.3 Electrical connection

The electrical connection should be carried out by an authorised electrician in accordance with local regulations.

Warning

Before beginning the electrical connection, make sure that the electricity supply has been switched off and that it cannot be accidentally switched on.

Warning

Applies to supply voltages above $30 \text{ V}_{\text{RMS}} / 60 \text{ VDC}$:

The installation must incorporate a circuit breaker in order to switch off the mains supply. It must be close to the CIU unit and easily accessible for the operator. It must be marked as circuit breaker for the CIU unit. The circuit breaker must be according to IEC 60947-1 and IEC 60947-3.

Warning

Branch circuit protection:

The CIU unit must be protected by a branch circuit fuse in accordance with local and national regulations.

Caution

Supply voltage to the CIU unit:
24-240 VAC/VDC - 10 %/+ 15 %.

If the CIU unit is mounted on a DIN rail WITHOUT earth connection or on a wall, it must be connected to earth via the earth terminal. See fig. 4, pos. 4.

Note

To ensure a stable and reliable communication, the cable screen for GENibus connection must always be connected to the earth clamp. See fig. 5, pos. 4.

4.3.1 Connection of power supply and GENibus

Warning

The CIU unit and GENibus must only be connected to SELV or SELV-E circuits.

1. Remove the cover.
2. Connect the supply cable to the CIU unit (fig. 4, pos. 1, 2 and 3).
3. Loosen the earth clamp (fig. 5, pos. 4).
4. Connect the conductors to terminals A, Y and B (fig. 5, pos. 1, 2 and 3).
5. Connect the cable screen under the earth clamp, and tighten the earth clamp (fig. 5, pos. 4).
6. Connect the network cable to the CIM module. See the installation and operating instructions for the CIM module in question.
7. Fit the cover.

Caution The CIU unit must not be exposed to direct sunlight.

6. Cleaning

The CIU unit must only be cleaned with a dry or wet cloth.

7. Disposal

This product or parts of it must be disposed of in an environmentally sound way:

1. Use the public or private waste collection service.
2. If this is not possible, contact the nearest Grundfos company or service workshop.

Subject to alterations.
